

## Teflon Coated Fiberglass Tapes (F10011)

Teflon adhesive tape is using kinds of fiberglass woven basal fabric which are coated with PTFE by special process. It is a new product with high capability and multiform function of complex material. Fiberglass fabric coated with PTFE has various good capability and it is widely used in aircraft industry, paper manufacture, food, environment protection, print and painting, costume, chemical, glass manufacture, medical, electronic, insulation, building (basic cloth of topping frame), sharpener slice, machinery, etc.

### Specification:

Item No	Thickness	Max Width	Adhesion(to steel)	Tensile Strength	Temperature Resistance
F7008	0.08mm	1250mm	22N/100mm	900N/100mm	70-260℃
F7013	0.13mm	1250mm	28N/100mm	1700N/100mm	70-260℃
F7018	0.18mm	1250mm	48N/100mm	2750N/100mm	70-260℃
F7025	0.25mm	1250mm	62N/100mm	3650N/100mm	70-260℃
